Description

Application under test: https://demo.opencart.com/admin/

Manufacturers in the administration interface: the Manufacturer section is used to categorize products by manufacturer. This section can be accessed under Catalog > Manufacturers.

Requirements:

The Manufacturer names should come with the install.

They could be deleted.

New manufacturer information could be added.

The manufacturer information should be created before products are added, so the manufacturer category can be selected when adding the product. Saving a product without including the manufacturer isn't advised, because customers can search for products in the store front through their manufacturer page. With the manufacturer missing from the product information, the product will not be available on those pages.

To insert a new manufacturer, the following information should be required:

Manufacturer name:

- **Stores**: Default will be selected if there is only one store. If you have more than one store using OpenCart, you can add a manufacturer to multiple stores by checking on them.
- **SEO Keyword**: the keyword used for search engine optimization (optional).
- **Image**: an image of the manufacturer (optional).
- **Sort Order**: the position the manufacturer will be sorted among multiple manufacturers (optional).

Acceptance Criteria:

1. The website platform should be online and running.
2. The Manufacturer section should be implemented under Catalog.
3. The Admin should be able to add valid information into required fields on the Manufacturer section.
4. The Admin should be able to access the Manufacturer details.
5. The Admin should be able to delete a Manufacturer.

6. The Admin should be able to add a Manufacturer name.
7. The Admin should be able to add manufacturer for any new product added on the store.
8. The Manufacturer section should be easy to find on the menu page.
